- ◆◆◆ A nursing home receives three diamonds if there is statistical confidence that the home's score is significantly above the Rhode Island average for that domain or for the total score.
- ◆◆ A nursing home receives two diamonds if the home's score is not statistically different from but is actually about the same as the Rhode Island average for that domain for the total score.
- ◆ A nursing home receives one diamond if there is statistical confidence that the home's score is significantly below the Rhode Island average for that domain or for the total score.
- Two dashes indicate that the facility did not have enough responses to calculate a score for that domain or for the total score.
